Features

- Features : Low elongation
- Features : 8x braided construction
- Features : High visibility
- Fishing techniques : Spinning
- Fishing techniques : Lure fishing
- Fishing techniques : Surf casting
- Fishing techniques : Beach casting
- Fishing techniques : Rock fishing

Description

Asso Lure Braid is a perfectly refined 8-ply braid produced with top quality raw material which ensures quality and performance over time. The "duracolor" technology ensures maximum color durability, especially in medium / large sizes: fibers are dyed before being braided, thus guaranteeing greater color absorption. 8-ply construction for better roundness. Zero stretch even in the micro-sizes. High abrasion resistance even in presence of dense vegetation. Suitable for lure fishing. Especially indicated for reel.
